

INQUIRE MD

AVIATION

Your In-Flight Virtual Doctor

THE PROBLEM

- ✓ 1 In 600 Flights Has Medical Emergency
- ✓ Over 4,000 Diverted Flights
- ✓ Nearly \$2 Billion In Unnecessary Costs
- ✓ Increased Liability On Airline
- ✓ Decreased Patient Outcomes

THE SOLUTION

- ✓ In-Flight Emergency Software
- ✓ Remote Consultation With Physician
- ✓ HIPAA Compliant Live & Recorded Video, Audio, Text Chat & More
- ✓ Complete On-Scene Management with The Ultimate Remote Triage Tool

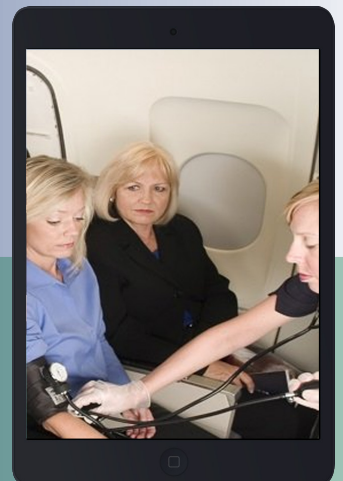

THE VALUE

- ✓ Provide Real-Time Medical Help Anywhere Across The Globe
- ✓ Reduce Reroutes By 75%
- ✓ Save \$20,000 To \$600,000 Per Reroute
- ✓ Decreased Liability For Airline, Employees & Onboard Doctors
- ✓ Increased Safety & Patient Outcomes

FEATURES

- Video Conferencing With Doctor/Multiple Parties
- Recorded Events For Post Event Analysis, QA & Reports
- Text Chat, Notes, Bookmarks, Geo-Tagging
- Share Events With Other Needed Specialists
- Privileged And Confidential Documents
- HTML5 And IETI Compliant

INQUIRE MD

INQUIRE MD IS THE NEW GENERATION OF ESCALATION, COLLABORATION AND ANALYZATION SOFTWARE FOR HEALTHCARE PROVIDERS

Inquire creates events through the cloud using an Android or IOS Application. It can also be used as a transcription device. Stream them live, record with bookmarks and notes, create audio and chat conferences, and automatically upload to the Inquire Server. Manage all of the events in one location for better QA, Training, and Reporting. Watch them live or later search on date, time, patient ID, bookmarks, bookmark notes, GPS location, and device ID. In addition, perform QA evaluations and run reports.

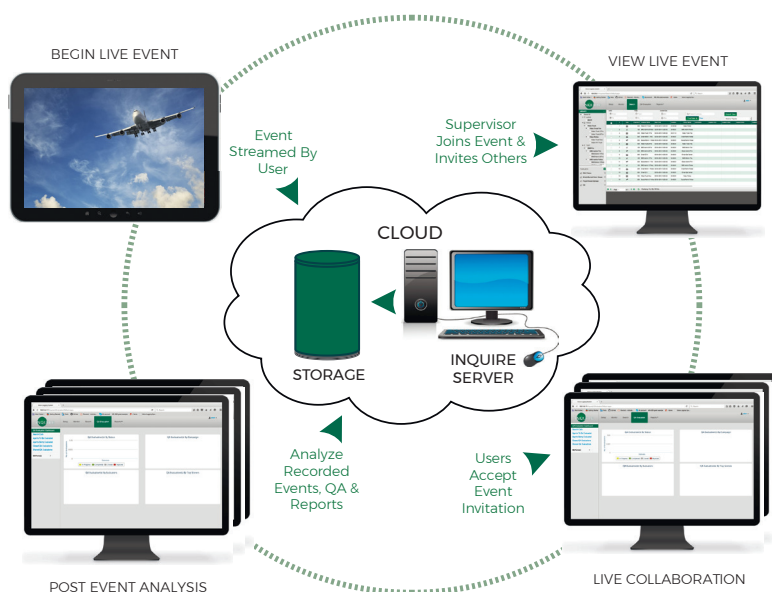

There is a need in the commercial aviation industry to improve the efficiency of how medical emergencies are handled in the air. Currently there is a radio network and various points that the communication goes through between air crews, ground operations and the physician. By utilizing the InquireMD app, air crews would be able to connect an audio / video conference directly between the Patient on the plane and the Physician on the ground.

The Inquire app would also allow the Flight Operations and Pilot to be conferenced into the conversation to help decide on whether the aircraft should continue to its original destination or be diverted to a closer airport. It is estimated that there is an in-flight medical emergency on **1 in 500 flights** and it is estimated that **the cost to the airline to divert a flight is somewhere near \$35,000.00 per event.**

Inquire MD captures both audio and video at the scene of the event in real-time. MD enables simple recording, bookmarking, chat, and streaming from any location on an Android or IOS device via Wi-Fi or cell phone service. (based on service carrier) Events are stored and managed in a secure cloud environment for later viewing, reformatting and distribution.

Activity and audit reports can also be run to ensure a true "Chain of Custody".

Inquire MD gives a workflow solution that streamlines process and increases efficiency. Flight crews and operations personnel are more and more concerned about the cost associated with in air emergencies and how to properly assess those to ensure they are not diverting aircraft un-necessarily.

FEATURES

- » Physician On Ground Has Direct Contact With The Patient
- » Ability To Transmit Vital Signs To The Dr.
- » Simple Operation
- » Accurate Documentation- No More Note Taking
- » Totally Secure In The Cloud
- » GPS Location
- » Allows For Live Collaboration With Specialists
- » Attaches Files/Graphics To The Record
- » Customize Bookmarks & Reports
- » Quick Retrieval, Review And Reformatting
- » Better Assessment Of Patients In The Air
- » Cockpit Crew Remains Secure In The Cockpit While Collaborating With The Patient And Ground
